

Fix the Drips. One drop of hot water a second is nearly 500 gallons a month of wasted energy down the drain.

Using a space heater in small areas, for short periods of time can be economical.

Make sure your home is well insulated and air-tight.

OUR ENERGY SAVING TIPS

Will Keep You In the Green

Check your central air conditioning/heating system's filters once a month and clean or replace them when needed.

Compact fluorescent lights use 25% of the energy of traditional incandescent lightbulbs and last up to ten times longer.

We're here to help you keep your utility bills as low as possible. Call Energy Services at 551-1525 or visit www.guc.com for more ways to save.
