

Clean your dryer's filter after each use. Dryer filters full of lint will cause your dryer to work harder and longer, using more energy.

Using a space heater in small areas, for short periods of time can be economical.

Make sure your home is well insulated and air-tight.

OUR ENERGY SAVING TIPS ARE

As Reliable as an Old Friend

Compact fluorescent lights use 25% of the energy of traditional incandescent lightbulbs and last up to ten times longer.

Check your central air conditioning/ heating system's filters once a month and clean or replace them when needed.
