QUESTIONS AND ANSWERS FOR 24-19

RFB FOR GAS METERS

4/25/2024 at 4:00PM

1. Upon review of the bid documents for this bid package, the meter specifications require the price for the AC250 meters to include the mounting of Itron ERT (provided by Greenville). Please advise if you have an estimated delivery for the ERT's for these meters as we have seen deliveries extend significantly for the ERT's which will impact the delivery of the meters. Our records indicate that the last purchase of the AC250 meters did not require the ERT to be installed.

Yes we will install the wets this time because of the unknown getting erts currently.

2. Also, we noted that on page 9 of 20 of the bid document, it indicates the proposal deadline is November 16, 2021 – which we obviously realize is April 25, 2024, but just wanted to make you aware.

Yes. The correct due date is April 25, 2024 @ 4pm.
